Description

GUM ROSIN:

- 1. MERKUSII GUM ROSIN**
- 2. MASSONIANA GUM ROSIN**
- 3. KESIYA GUM ROSIN**

Properties:

It is a solid resin with softening point around 76-81 oC and can be dissolved in many solvents.

Applications:

It is processed by highly qualified professionals who meet the set norms of the industry. It is an important raw material for the production of paper, coatings, inks, rubber, soaps, electronic industrial products, food grade ester gum, rosin ester resins etc.

Packing:

1/ packed in new Galvanized iron sheet drums with 225 kg net/drum, gross weight 231 kg/drum.

2/ packed in new Kp Bag, with 25kgs/Bag.

GUM ROSIN: GUM ROSIN

Storage:

Dry and cool storage; in well-closed container, avoid oxidants environment, strong light or heat.

Payment: By L/C at sight or TT in advance
