Description

Applications:

It is used in synthetic camphor, terpineol, synthetic perfume, medicine, synthetic resin, aspect industrial chemicals . Its main composition is pinene, with special chemical activity, it is a good solvent and an important raw material for the manufacture of coatings, synthetic camphor, synthetic resin, synthetic spices and other organic industrial products, etc.

Packing and Storage:

- In good second-hand plastic drum; net weight 180 kgs/drum
- In Iso tank (20.000 kgs/iso tank) or Ibc Tank (900 KGS/Ibcs Tank)
- Other packing shall be agreed by both parties

Storing and Transporting:

- Must be kept away from heat and flame.
- Store in a cool, dry place; in well-closed container; keep away from strong light, heat or fire.

Technical Specifications:

Type	Super	1 st
------	-------	------

Appearance	Transparent, anhydrous, no impurity and suspended substance	
Colour index	Transparent White	
Relative Density Max	0.870	0.880
Refractive index	1.4650?1.4740	1.4670?1.4780
Alpha pinene % Min	80	66
Beta % Min	8	4
Acid Value? Mg/g Max	0.5	0.5
Specific gravity at 15c	0.857 -0.860	0.857 -0.8600
